EVIDENCIAS DEL PROCESO

Creación de Resource Group(Uno para los dos ambientes) llamado rg-dbk-projects

The image shows two screenshots from the Azure portal. The top screenshot is the 'Create a resource group' form, and the bottom screenshot is the overview page for the 'rg-dbk-projects' resource group.

Create a resource group

Home > Resource Manager | Resource groups

Basics Tags Review + create

Resource group - A container that holds related resources for an Azure solution. The resource group can include all the resources for the solution, or only those resources that you want to manage as a group. You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization. [Learn more](#)

Creación Storage account Raw

Home > Storage center | Blob Storage

Create a storage account ...

Azure Storage is a Microsoft-managed service providing cloud storage that is highly available, secure, durable, scalable, and redundant. Azure Storage includes Azure Blobs (objects), Azure Data Lake Storage Gen2, Azure Files, Azure Queues, and Azure Tables. The cost of your storage account depends on the usage and the options you choose below.
[Learn more about Azure storage accounts](#)

Project details

Select the subscription in which to create the new storage account. Choose a new or existing resource group to organize and manage your storage account together with other resources.

[Deploy to an Azure Extended Zone](#)

Preferred storage type

Choose preferred storage type

ⓘ

This helps us provide relevant guidance. It doesn't restrict your storage to this resource type. [Learn more](#)

Performance * ⓘ

☒ Standard: Recommended for most scenarios (general-purpose v2 account)

☐ Premium: Recommended for scenarios that require low latency.

Redundancy * ⓘ

Geo-redundant storage (GRS)

☒ Make read access to data available in the event of regional unavailability.

☐ Geo priority replication guarantees Blob storage data is geo-replicated within 15 minutes.
